BAGAX

PROTECT YOUR STUFF

BAGAX | Protect your Stuff is a new equipment company for professional event technology, founded in 2020 by the parent company SRV Distribution in Dörverden (Germany).

Behind SRV Distribution is a team of German specialists, each of whom has more than 20 years of experience in professional audio and event equipment.

Bagax offers lightweight, professional stack racks for 19" equipment with individual, well thought-out detail solutions as well as bags for trusses and other event equipment in highest manufacturing quality to easily transport and perfectly protect professional equipment in daily use.

- ▶ 25% lighter than comparable professional racks
- ▶ The black slide-in doors can be replaced with transparent and impact-resistant Makralon doors so that the contents are always visible
- ▶ Available in the dimensions 60cm x 60cm and 60cm x 78cm for devices with greater installation depth
- ▶ Stacking recesses, connection mechanism and the cable passage for the standard 60x60cm case is compatible with the deep 60x74cm X-Series cases

9B1920004	4	60cm x 22,5cm x 78cm
9B1920006	6	60cm x 33,6cm x 78cm
9B1940000	Roller board with 2 brakes	60cm x 12,4cm x 78cm

Racks with **unique detail solutions** - the best for your business

Black steel rivets are set on all corners and edges. It does not stand on the Polyurea surface, instead it stands on the black rounded rivet heads to safe the Polyurea surface.

Housing protected by rivet heads when upright.

The stack racks can stand upright at 90 degrees on shelves without standing on protruding handles or other components.

All surfaces are flat, they only stand on the black steel rivets.

The racks can be quickly and securely connected to each other by an outside mechanism with a quick lock pin. The pins are secured with steel cables and cannot get lost. On the wheeled board, the racks can also be firmly connected with this.

No further tools are needed to connect.

The front door has a label holder for picking slips or labels with description.

Stickers or other labels are no longer needed. Opening the doors to check the contents is no longer necessary.

The racks can remain wired with the doors closed. The doors are pushed in from the side, a cut-out at the top and bottom of the rear part of the racks makes it possible to wire stacked racks together.

Cables do not have to be disconnected to close the doors.

The rack rails are mounted on large rubber shock absorbers inside. This provides additional protection for high-quality equipment.

The installation depth can be adjusted even after the unit has been installed. This works via sliding slides on the underside of the racks.

Simple and fast adjustment of the installation depth from the outside.

Racks and wheelboard as well as the castors are completely black, there are no shiny components. All metal is black powder coated.

The stack racks integrate inconspicuously into any stage set.

Perfect bags to protect F34 truss elements during transport and storage

Bagax Truss Bags are robust, high-quality bags in which standard F34 4-point trusses can be stored and transported safely. They are ideal for protecting powder-coated trusses against impacts during transport.

Cleverly positioned grip holes and carrying straps make all bags easy to carry and handle. Thanks to the Velcro fasteners, the bags can be easily opened and quickly closed again.

3-Way Corner Bag 90°

3-Way Corner Bag T-Joint

2-Way Corner Bag 90°

Box-Corner Bag

F34 Truss bag for 1m/1,5m/2m/2,5m/3m pieces

Truss bag with removable handle

The bags for metre pieces can be opened at the front and back. This allows connected truss pieces to be transported on a truss dolly. The opened flaps connect to the next bag via Velcro.

These bags are only a small selection of our product range.
