

Registration User Network

Please register in our user directory if you want to network with other Voice-Acoustic users or be found by potential customers. The user directory is for all Voice-Acoustic users, regardless of whether new or used goods have been purchased. You can have your material stock updated by us at any time.

All self-powered loudspeakers, HDSP-A and HDSP-DDA system amplifiers are compatible with each other in one system. If you want to temporarily add to your equipment and rent something, it is independent of which of our system electronics is used for operation, control, networking and performance. All Voice-Acoustic users worldwide are compatible with each other.
